Solution

A small number of users adding and editing content for public consumption, including search engines

In 2016 **more than 3.5 billion people** used the internet.

Around 40% of the world population has an internet connection today. In 1995, it was less than 1%.

The **number of Internet users has increased tenfold from 1999 to 2013.**

Why You Should Want This

- **If you are not online, it's as if you don't exist.**
- If you don't own your own domain name, you are not in control of your digital identity.
- If you don't have a website, you don't know how many opportunities you have lost.
- Thanks to content management features, you can easily keep your website up to date, without paying for a programmer (unlike in the early days).
